

Plumbing Studies Diploma Level 2

This Level 2 one-year course will ensure you are fully knowledgeable in all plumbing and heating systems. To become a fully qualified plumber, most people start here.

We offer both full-time study and apprenticeship options for you to train to be a professional plumber. If choosing the full-time route you must complete the Level 2 and 3 qualifications, which will take two years. We also offer a Level 1 introductory year if you do not have the required grades to start at Level 2.

Often called upon in an emergency, if you can fix a leaking pipe, mend a broken toilet, or repair a central heating system, you will be hailed a hero. An experienced plumber should have the ability to work in a variety of different environments and during your time with us we will teach you the practical, hands-on skills and industry legislation to enable you to do this, either as an employee or running your own business.

□ Ideal if

You want to work in the industry and are looking to build the intermediate skills and experience that you need to go further.

□ You'll need

Four GCSEs at grade 4 or above (including English and maths) or successful completion of the Level 1 course.

□ You'll learn

Through a broad study programme of practical workshop activities in our home simulators, learning about repair and installation in realistic working environments. You'll also start to understand the technical and legislative demands of this trade through classroom-based theory sessions with our team of friendly expert tutors. Topics covered will include: health and safety, electrical principles and processes, cold water systems, domestic hot water systems, sanitation and drainage and functions of central heating systems.

□ Expect

To undertake a range of practical activities and gain a broad experience of the industry.
