KEY DELIVERABLES FOR THE INVESTMENT OF ESF FUNDING IN CORNWALL AND THE ISLES OF SCILLY:

Helping to develop the people of Cornwall and the Isles of Scilly

People are at the core of each project. Improving an individual's skills allows them to progress in their career and supports the needs of businesses, now and in the future.

Strengthening businesses

Investment in skills has helped to extend the skills base in key Cornish business sectors, such as tourism, care and food processing. This has contributed to better performing businesses and in some cases, has accelerated business growth.

Investing in our future

Enabling access to higher skills training has been positive for individuals and businesses. Stronger links have developed between training providers and businesses, leading to the co-creation of relevant programmes. This has extended the reach of skills training to new and different types of business.

Making connections

The skills programmes were real drivers of change, allowing individuals to develop to their full potential. The development of an improved skills base has ensured that Cornwall and the Isles of Scilly is more competitive and better connected to the wider economy.
